# SIM Card & Internet Guide | راهنمای سیم‌کارت و اینترنت

Arak University of Medical Sciences | International Clinical Nutrition MSc & PhD

Practical first-week checklist for international students

## Before purchasing

Ask the international office which identity documents are accepted for foreign students and whether your passport, residence/entry documentation and address are required.

## Choosing a mobile operator

Compare local coverage near your dormitory, campus and teaching hospitals, prepaid packages, data allowance and recharge options. Examples of nationwide operators include Hamrah-e Aval, Irancell and Rightel.

## Activation and registration

Buy only from an authorized retailer. Ask the seller to confirm that the SIM is legally registered in your name, activated, and able to make calls and use mobile data.

## Phone compatibility

An imported handset may be subject to Iranian handset-registration rules. Confirm current requirements with an authorized operator or the university; do not rely on unofficial activation services.

## University Wi-Fi

Ask IT for the official Wi-Fi network name, login instructions, password reset process, and acceptable-use policy. Do not share your university credentials.

## Troubleshooting

Restart the phone, check mobile-data settings, verify balance and data allowance, and ask the operator to verify APN settings. For campus Wi-Fi, contact university IT.

## Useful emergency numbers

Ambulance: 115; Police: 110; Fire: 125. Confirm dialing availability on your SIM.

Operator tariffs, registration rules, and campus login details change; verify before publication.
