ResearchGate is a free social network for scientists and researchers, which is called "Facebook for scientists".

they know. This network was established in 2008 with the aim of providing a collection of tools for collaboration, knowledge sharing and creation

Collaboration is one of the main goals of this network, the work and discovery network among scientists was launched. Discovery, communication and

It is social. The message that the researchgate social network itself has placed on its front page indicates this goal

"Discover scientific knowledge and make yourself visible to others". Many researchers and scientists direction

They use this social network to establish their position as an expert in a specific scientific field. Including

The possibilities that this network provides to researchers: effective and efficient cooperation with each other, introduction of researchers through

Academic profile, networking and communicating, staying up-to-date, working on joint projects, following articles

GATE in others and yourself, follow questions and answers, compare answers and refer to articles. research

Rows of research information sites have been categorized. These sites are facilities for the researcher to stay up-to-date

Communication with network news and his research field, permission to create a specialized profile, access to information about interests, etc

The researcher's current work and also the tracking of other users who work in his field of activity are possible.

Features of Research Gate

and facilities for global scientific cooperation. Research registration

Gate provides its members with a number of tools

It is free on this network. This network is not limited to a specific field and researchers from all fields can enter

Register this network. After registration, the researcher can find the titles of his works, his fields of interest and skills through

Share your professional profile with other researchers. This network has connections with other social networks such as

Gate is also Facebook, Twitter and LinkedIn, so every person can do research through the profile available in these networks

communicate

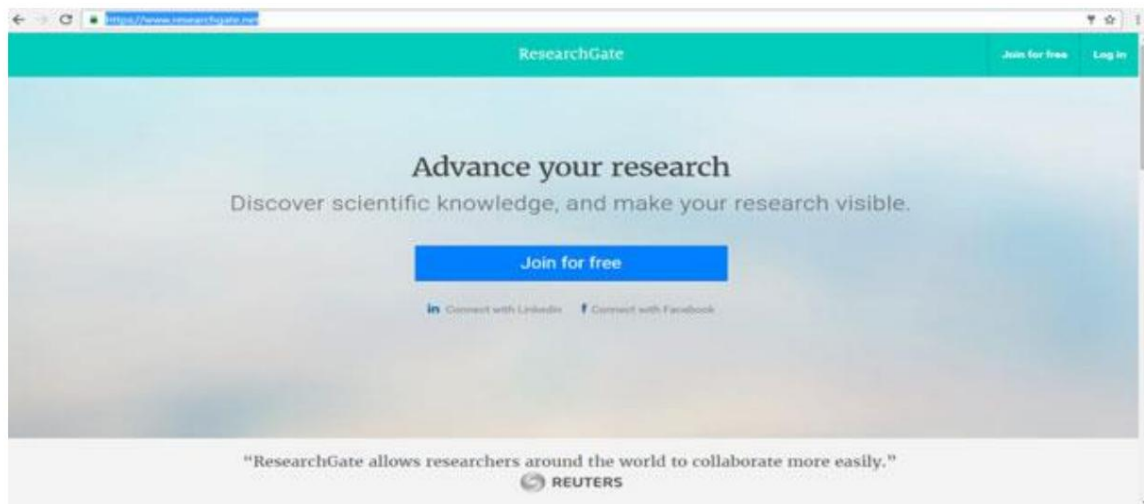

Research Gate registration guide

Gate, first enter the following address: research To register in the system

<https://www.researchgate.net>

With this address, we enter the following page, which is the beginning of the registration phase of this system. By clicking on the option for Join

this system. free, we enter the second page of

To register, the type of user must be determined based on research activity and affiliation. Users who are academics or researchers

They should choose the Student or Academic option, if they have a government personality, the Corporate option, users

And users who are not researchers can choose the researcher a Not option.

Medical doctor

What type of researcher are you?

-  **Academic or student**
University students and faculty, institute members, and independent researchers
-  **Corporate**
Technology or product developers, R&D specialists, and government employees in scientific roles
-  **Medical**
Health care professionals, including clinical researchers
-  **Not a researcher**
Journalists, citizen scientists, or anyone interested in reading and discovering research

The faculty enters. According to the image below: ^{And} In the third stage, the name of the university

Overview Contributions

1. Overview of ongoing projects, projects that will be done in the future, the number of citations received

research fellow.

2. Research In this part of the researcher's profile, the following can be seen:

o The number of research projects,

o The number of researcher's articles,

o number of papers for conferences,

o Number of full text articles,

o number of posters,

o number of questions,

o Number of responses.

3. Experience This new section has been added. In this section, you can share your professional and educational experiences

colleagues and more connections in the field

Showcase to find potential future employers and

Establish professions and science.

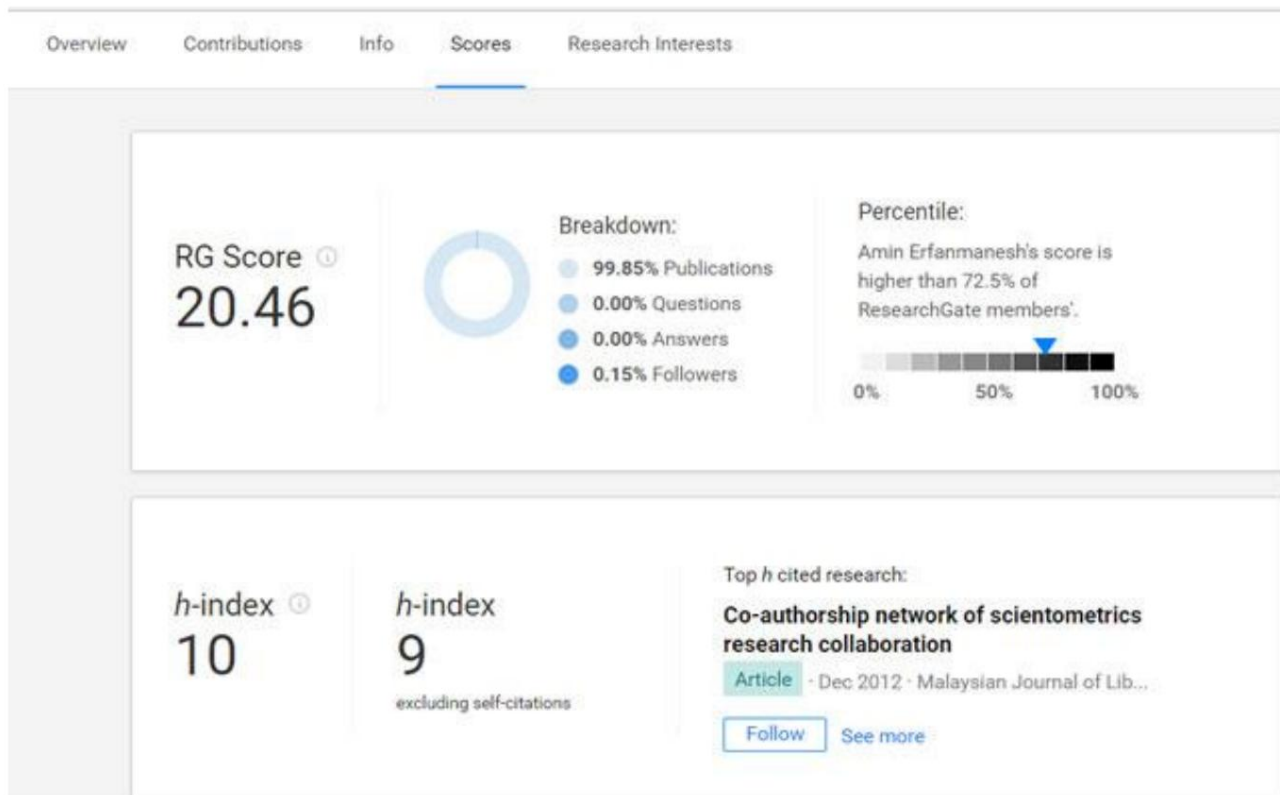

4. Stats in this section, Recommendations, Citation, Reads in the form of graphs based on the date of the sign

It will be given. This section is visible only in the author's or researcher's own profile.

5. Scores Researchgate social network has an evaluation index called "Score RG" that is related to internal activity

and researcher's publications, number of followers, number of researcher's questions and answers Researchers in this system including the number of articles

it depends.

The index-h index is one of the other indices that can be seen in this part of the Researchgate system. this

The index is first interviewed in general, then without considering self-citations (Citations-Self).

.6 Following. In this section, you can see the followers.

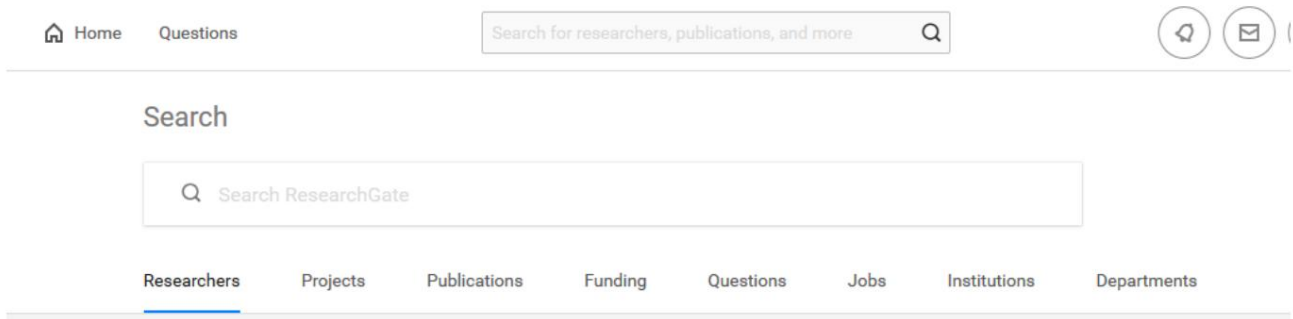

Another important topic in this system is the creation of a project that the researcher can define his project in this system, which causes

It is possible that more people will become aware of the project, questions and answers will be raised about it to become stronger

The project helps. The more information about the project is provided to other researchers and the project by

It also provides the possibility of attracting financial support. More people should be recommended to increase the importance of the project

In this site, it is also possible to search based on the name of researchers, organizations and subject.

Gate has increased its meaning search engine; in such a way that the permission to search simultaneously in seven research

and ..., so that it is possible to view reviews and also download articles ³Ripak 2 , Sir site ¹PubMed database

There is a full The search engine provides a wide chain of information that uses standard keyword searches

Analyzes to get more accurate results. It is now possible to search between 40 million articles through this network
