Medical Faculty

Medical Faculty

about the field

The fields of this faculty at the doctoral level are 7 years of medicine and 6 years of dentistry, 4 years of undergraduate midwifery and 2 years of midwifery counseling at the master's level, as well as Ph. .D is 5 years old.

The residency period is one of the most important stages of medicine, which is considered a starting point for doctors to specialize and gain sufficient experience in the field of medicine. At this stage, after completing university education, doctors are in practical contact with their patients and colleagues in the hospital environment to improve their professional experience.

Faculty of Paramedical

Bachelor

- Radiation Therapy Technology
- Radiology Technology
- Laboratory Science
- Anesthesia
- BOperating Room

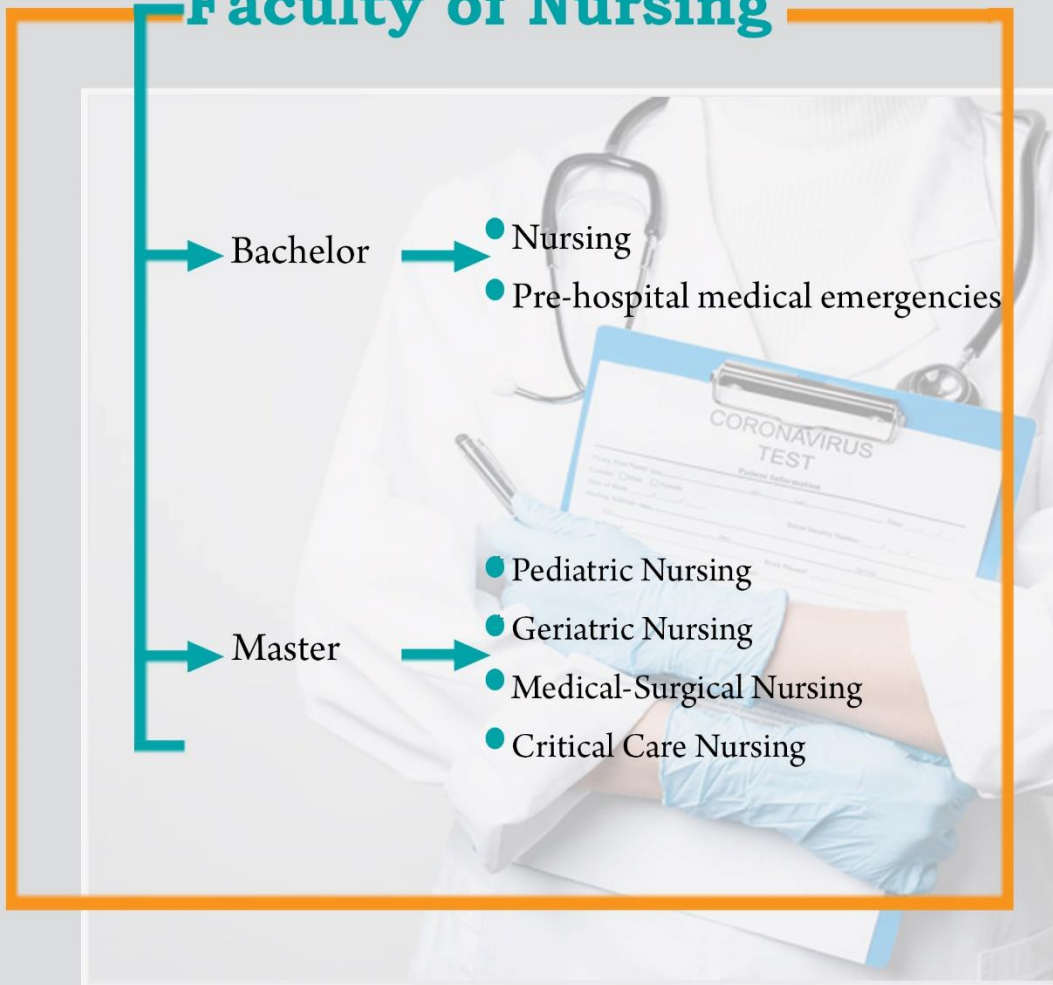

about the field

The mentioned fields in the paramedical faculty are 4 years long and after graduation, the students will work in medical centers such as hospitals, clinics, laboratories, etc.

Paramedical fields are complementary to medical specialty fields and are next to specialists. If necessary, paramedical experts should refer the patient to a specialist for diagnosis and final treatment.

Faculty of Nursing

about the field

The 2 majors in the paramedical faculty are studied for 4 years, and nursing students can work as shift nurses, supervisors, clinical supervisors, infection control supervisors, educational supervisors, and nursing managers in hospitals after completing their studies. . If they want, they can create a private health center to assess the health status of people in this city.

The field of medical emergencies also provides relief and first aid services to patients and injured in various accidents until they are transferred to medical centers.

Graduates of emergency medicine can work in emergency medical centers, private ambulances or similar organizations.

Faculty of Public Health

about the field

The mentioned courses are held in the Faculty of Health at the 4-year undergraduate level and at the master's level for 2 years.

After completing their education, health students can work in related fields such as water and sewage health, waste, air pollution, safety in industries, as well as health care workers and health experts in health centers and hospitals.

Nutrition graduates can also work in hospitals, clinics and also privately.
